The following is an Examiner's Statement of Reasons for Allowance: Applicants' arguments of 11/13/2006 have been found convincing concerning the combination of Countryman and Pettersson References. The claimed combinations found within Independent Claims 1, 6 and 15 are not disclosed nor would have been obvious in view of the Prior Art of Record. It is noted that some of the language found in Independent Claims 1 and 6 was objected to in the Office Action of 8/9/2006 and the claims have now been amended by Applicants with respect to the objections. It is the position of the Examiner, based upon Applicants' Response and at least as supported in Figure 2, that the similar language found in the Instant Independent Claims, i.e. "at least part of each of the first and second tracks is located between at least one of the first and second diodes and the connection terminal" is not limited to a single diode (via the alternative language), but rather it is understood and would have been clear to one having ordinary skill in the art at the time of the invention that at least part of the first track is located between at least one diode and the connection terminal and at least part of the second track is located between another diode and the connection terminal.

Any comments considered necessary by Applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ronald W. Leja whose telephone number is (571)272-2053. The examiner can normally be reached on Monday thru Friday.
